Summary

Junior Fullstack Developer with small commercial experience in one real project. I work with Vue 3 on the frontend and Laravel on the backend. I'm looking for a Junior position where I can grow quickly through mentorship and real product tasks.

Experience

Junior Fullstack Developer

Project: E-commerce Web Application / Internal Management Tool

- Implemented simple pages and components in Vue 3.
- Added and maintained REST API endpoints in Laravel.
- Worked with MySQL: basic CRUD and simple queries.
- Used Git daily, tested API routes in Postman, fixed bugs from QA/team feedback.
- Participated in code review and Agile team routines.

Skills

Frontend: Vue 3, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Laravel, PHP, basic Node.js/Express

Databases: MySQL, basic MongoDB

Tools: Git, GitHub, Postman, basic Docker, Agile/Scrum

Education

National Aviation University (NAU), Kyiv

Bachelor's Degree — Security of Information and Communication Systems
